Dear Mr. Boynton;

I am writing to you to inform you of my concerns regarding Broadwater's liquefied natural gas facility. I DO NOT support the construction of this monstrosity and I DO NOT wish to live in an environment polluted by unrenewable technologies. There are those who feed from the bottom and those who feed from the top. Do not disregard the unseen, smaller things in life... because ALL life is sacred. Please do not let your short-sightedness be the cause of a decrease in the quality of living for future generations of not only your own family, but the families of ALL LIVING THINGS.

I am writing this letter to to let you know that we are not in favor of the " Proposed Liquefied Natural Gas Facility".

I am curious as to what your position is on this issue.

It doesn't take a genius to realize that the potential for destruction of the natural environment ... land, sea and air will be greatly increased by this facility.

**A LIQUIFIED NATURAL GAS FACILITY DOES NOT
BELONG IN LONG ISLAND SOUND!**

Sincerely,

Robert & Betty Henken

Dear Captain Boynton,

We would like to state our views
on the proposed Liquefied Natural
Gas Facility in the Long Island
Sound.

We feel that the Sound has its
share of environmental problems as it
is. We strongly oppose this facility
being constructed there. It does not
belong in LI Sound and would
endanger the health and safety of
Long Islanders.

TO ~~THE~~ CAPTAIN ROYNTON,

A LIQUIFIED NATURAL GAS FACILITY DOES NOT BELONG IN LONG ISLAND SOUND. A FEW REASONS I FEEL SO STRONGLY ABOUT THIS IS FIRST OF ALL, IT'S WHERE THE WILDLIFE LIVE, AND DEPEND ON. ALSO, THE FISH (ALL SEAFOOD) ARE TESTED FOR TOXIC WASTE BEFORE PEOPLE EAT IT. ANOTHER VERY STRONG REASON IS POLLUTION. THIS IS JUST A FEW COMMENTS ON WHY IT WOULD BE A VERY, VERY BIG MISTAKE TO PROCEED WITH THIS ACTION. I'M SURE MANY, MANY PEOPLE FEEL THE SAME WAY. I HOPE YOU TAKE THIS INTO CONSIDERATION, AND MAKE THE RIGHT DECISION. THE PUBLIC IS COUNTING ON YOU.

THANK YOU

Captain Boynton;

I am writing to request your support in opposing the introduction of a liquefied natural gas facility into Long Island Sound. I believe that this (or any other such facility) would endanger the health and safety of Long Island Sound.

I have a young daughter whom I am raising alone here on L.I., and my concern is for the safety of the environment in which we live. In addition, building this facility would limit public access to the waters for fishing and swimming.

By allowing this facility to be built, it would open the door for other such facil-

facility

ities, and my fear is that all of Long Island Sound would eventually become industrialized.

Please lend your support to those of us who are opposed to this. I would appreciate a response in writing, informing me of your decision.

Thank you for taking the time to consider my fears.

Sincerely,

✓ whom it may concern,

I have recently been contacted by Bill Taylor; a representative of the citizens campaign for the environment, who informed me of the broadwater project and now it will be detrimental to Long Island Sound and the environment surrounding, as it may temporarily solve crisis it will also ruin our environment and make our water bad and also ruin our view of it with tankers and other ships. As an active voter I think you should vote against this project, it is already an expensive project and will be for the whole future of the project. I am very concerned and disagree with it. Thank you for taking the time out to read this.

Sincerely,

Mary Oudea

Stop Industrialization of Our LI Sound

Proposed Liquefied Natural Gas Facility Endangers the Long Island Sound

The attacks on Long Island Sound continue. Broadwater, a venture between Shell Oil and TransCanada Pipeline, is seeking to build a liquefied natural gas facility nine miles off Rocky Point in the middle of the Long Island Sound. If approved this facility could represent the first of its kind throughout the world and would be the largest industrial use in our Sound.

Importance of Long Island Sound

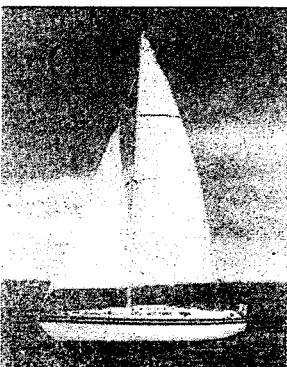

Long Island Sound is an estuary of National Significance, where salt water and fresh water are constantly mixing to create a unique environment. This delicate habitat supports a variety of fish and wildlife, including 125 species of birds. More than 56% of all protected species, including sea turtles, rely on Long Island Sound's habitat.

The Sound generates an estimated \$5.5 billion annually for the regional economy. Twenty million people live within 50 miles of the Sound's beaches. Residents of New York and Connecticut depend on the Sound for recreational purposes, including fishing, sailing, and swimming, as well as commercial purposes such as harvesting of shellfish and finfish.

Overview of Broadwater Project

Broadwater is proposing to build a liquefied natural gas (LNG) facility nine miles off Wading River in the middle of the Long Island Sound. This facility would be as big as the Queen Mary II and would be on a mooring system. The base of the system would cover an area of 7,000 square feet on the bottom of Sound. The facility would move depending on the tides and the currents in the Sound. The LNG barge would require a 25-mile pipeline dug into the bottom of the Sound to connect the facility to the existing

Iroquois pipeline. Two to three large tankers per week would deliver LNG to the facility, taking up to 15 hours to offload. Since LNG is an explosive gas, there would be an approximate 1-mile radius around the facility that would become the first "PUBLIC NO ACCESS ZONE" on the Sound.

Industrialization of Long Island Sound

This project would allow multi-national corporations to assume control of several square miles of a local public resource. The Broadwater barge would dramatically change Long Island Sound from an open natural resource into commercial real estate. The required "safety zone" around the facility would no longer allow accessibility for commercial or recreational fishing, lobstering, sailing, boating or other user activities.

Long Island Sound should not be perceived as a "buffer zone" to protect populations along its shore from potentially dangerous, private industrial activities. **Long Island Sound is not for sale.**

June 30, 2005

JUL 07 REC'D

To Whom It May Concern:

We are strongly opposed to the proposed Broadwater LNG facility. The Long Island Sound is not for sale!

It is our most valuable resource, both financially and environmentally. The health and safety of our fellow residents are at risk. This gigantic structure does nothing for Long Islanders but is huge potential revenue source for the corporations sponsoring this project.

Renewable energy sources and conservation should be our goals, not endangering the environment and enriching the pockets of corporate entities.

Please do what is right...oppose this project and the federal government's attempt to bulldoze this through despite local opposition. Where the Republican Party's "less government" platform? States, apparently, have fewer and fewer rights and the federal government is becoming Big Brother. We cannot and must not allow this abrogation of local jurisdiction.

Thank you,

Mary and Herb Gardner

NEW HAVEN CT. 06512

DEAR SIR:

I AM WRITING THIS LETTER BECAUSE I AM VERY CONCERNED ABOUT THE FACILITY THAT SHELL OIL & TRANSCANADA PIPELINE ARE SEEKING TO BUILT ON LONG ISLAND SOUND.

MARINE LIFE WOULD BE THREATENED, AND ENDANGERED. AIR QUALITY WOULD BE POOR WITH AN INCREASE OF CARBON DIOXIDE THE PRIMARY CAUSE OF GLOBAL WARMING INTO THE ATMOSPHERE. THESE CONDITIONS WILL ENDANGER THE HEALTH AND SAFETY OF LONG ISLAND SOUND AND SHOULD NOT BE BUILT. IF THIS FACILITY IS BUILT IT WILL LIMIT PUBLIC ACCESS AND SETS A DANGEROUS PRECEDENT OF INDUSTRIALIZING THE SOUND.

PLEASE NOTIFY ME AS TO WHAT YOUR POSITION IS ON THIS MATTER.

THANKING YOU IN ADVANCE, I REMAIN,

SINCERELY,
